### OBJECTIVE

Front-End Developer with 2+ years of significant contributions to projects of various scopes. With my results-oriented mindset, seeking, learning and innovating new and efficient technologies to make aggressive deadlines consistently achievable. Passionate about going the extra mile to ensure the customer is unquestionably satisfied with the product or service provided. With an emphasis on scalable and well-documented code, I look forward to working collaboratively, learning even more, and willing to roam indefinitely.

- Develop website front end

#### Front End Internship

Mundo Digital

September 2018 - Jan 2019 / Angola, Luanda

- HTML, CSS and JavaScript to create responsive landing pages for business and customer.

### PROJECTS

#### Order Management System

- current

- Order Management System for Restaurants CDP\_Virtual (namely) is a web-system for Order Management for Restaurants, which aims to simplify the customers' waiting time because through this system, the customer can view the virtual menu and place the order from your telephone, your order will later enter the waiting list and the customer will wait without the waiter having to intervene with notes on paper. %Available on my Github%

#### Learning Platform

- Learning Platform This platform, namely as: Netstat, aims to teach programming from scratch to production %Available on my Github%

#### Personal Budget

- Record user budgets along with the CRUD option.
